New Optional Pressure Relief **Override Button**

ONLY ONE

Providing affordable T-Piece Resuscitation for every NICU bed.

Introducing a better way to deliver positive pressure ventilation to your infant patients with convenient in-line viewing and reliable easy-to-read airway pressure manometer with optional pressure relief override button.

The Neo-Tee is flow-controlled and pressure limited. It offers the ability to measure a more consistent, targeted Peak Inspiratory Pressure (PIP) and Positive End-Expiratory Pressure (PEEP).

With the new Neo-Tee, there's absolutely NO capital equipment to purchase and it is completely disposable.

Even Better . . . No fatigue from squeezing a bag since there is no bag to squeeze!

The Neo-Tee® includes a built-in pressure relief valve as an added safety measure, limiting ventilatory pressures to 60 cm of H₂O and the stay-put PEEP valve allows for quick and easy PEEP pressure adjustments as needed.

Advantages	
In-Line Controller	· Allows clinicians to change airway pressure "in-line" closer to the patient.
Disposable	· Reduced chance of cross-infection, No cleaning required · No capital equipment costs, Affordable at every bedside · Space saving · Lightweight and easily transported
Portable, Built-in Manometer on Tee	· Convenient in-line viewing, accurate and easy-to-read dial (+/- 3 cm H ₂ O up to 15 cm H ₂ O and +/- 5 cm H ₂ O above 15 cm H ₂ O) accuracy (0 - 60 cm H ₂ O)
Adjustable PIP Controller/ Built-in Pressure Relief	· Compact for setting/adjusting pressure · Connects to a flowmeter · Optional PIP controller with override button enables pressure to go to ranges between 40 - 60 cm H ₂ O when required
Variable PEEP Knob	· Increasing/Decreasing Pressure made easy · Easy-to-turn dial, stays put at desired pressure
Variety of Mask Sizes/Styles	· Choice of clear anatomical and round silicone face masks in both neonatal and infant sizes

Standard adjustable, easy-to-read PIP controller and safety pressure relief

Product Specifications

New Optional Pressure Relief Override Button

Undoubtedly an industry first, Neo-Tee is the only disposable T-Piece device on the market today that offers an improved built-in, easy-to-read monitor "on the Tee" with optional pressure relief "override button" for clinicians to override pressure to ranges between 40 - 60 cm H₂O providing convenient, in-line viewing of delivered airway pressure.

New style manometer has larger numbers and is easier to view, especially in dim NICU lighting conditions.

New In-Line PIP Controller allows clinicians to change airway pressure closer to the patient.

Neo-Tee Configuration Controller 12" from TEE

Mercury Medical
Your Need . . . Our Innovation®
50+ YEARS

Because they are not miniature adults.

Another important development in Infant Tee-Piece Resuscitation.

Your Need our Innovation®!

Introducing a better way to deliver positive pressure ventilation to your infant patients with convenient in-line viewing and reliable easy-to-read airway pressure manometer.

Mercury Medical® is pleased to announce the first single-patient-use infant T-piece Resuscitation device.

The Neo-Tee is flow-controlled and pressure limited. It offers the ability to measure a more consistent, targeted Peak Inspiratory Pressure (PIP) and Positive End-Expiratory Pressure (PEEP).

With the new Neo-Tee, there's absolutely *NO* capital equipment to purchase and it is completely disposable. Even Better . . . No fatigue from squeezing a bag since there is no bag to squeeze!

Providing affordable
T-Piece Resuscitation
for every NICU bed.

Undoubtedly an industry first, Neo-Tee is the only disposable T-Piece device on the market today that offers a built-in, easy-to-read monitor "on the Tee" for providing convenient, in-line viewing of delivered airway pressure. While budget constraints may prevent having capital equipment for the best patient care where its needed the most, just imagine having an affordable device like the Neo-Tee at every NICU bedside.

Patent # US 5,557,049 B1, Patent # US 8,522,618 B1
Other Patents Pending

The Neo-Tee® includes a built-in pressure relief valve as an added safety measure, limiting ventilatory pressures to 40 cm of H₂O and the stay-put PEEP valve allows for quick and easy PEEP pressure adjustments as needed.
